

KEPT

Promises *compound.*

Invest a little every week, with people who notice.

THE PROBLEM

**“I’ll start investing
next *week*.”**

Nobody notices when you skip.

**Apps show a balance
you can’t control.**

**Social investing means
showing your money.**

THE INSIGHT

Habits stick when someone *notices*.

Activity rings, for investing. Friends see the progress, never the money.

Promise Did you keep this week?

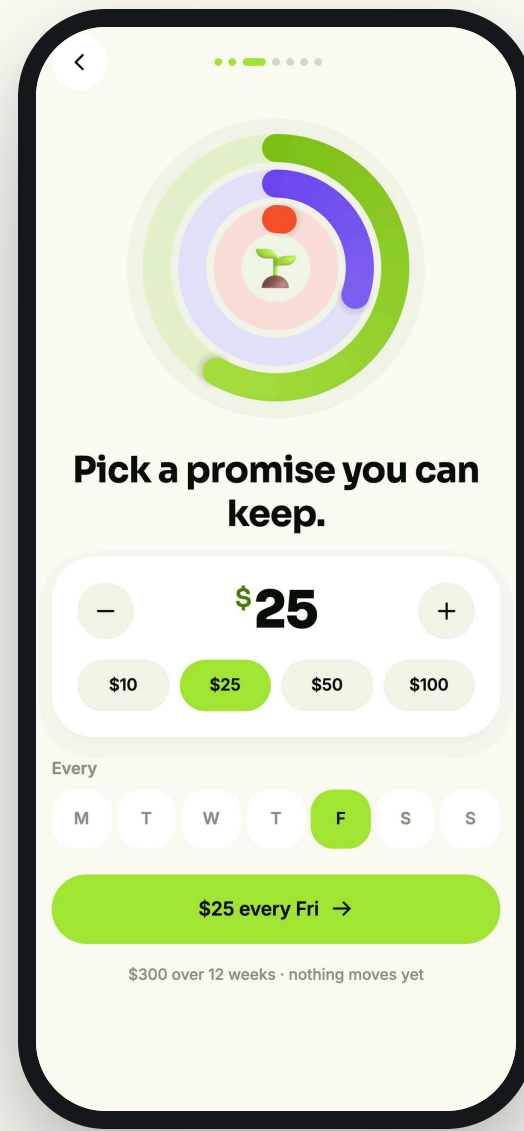

Goal How far along your goal?

Circle How many friends kept theirs?

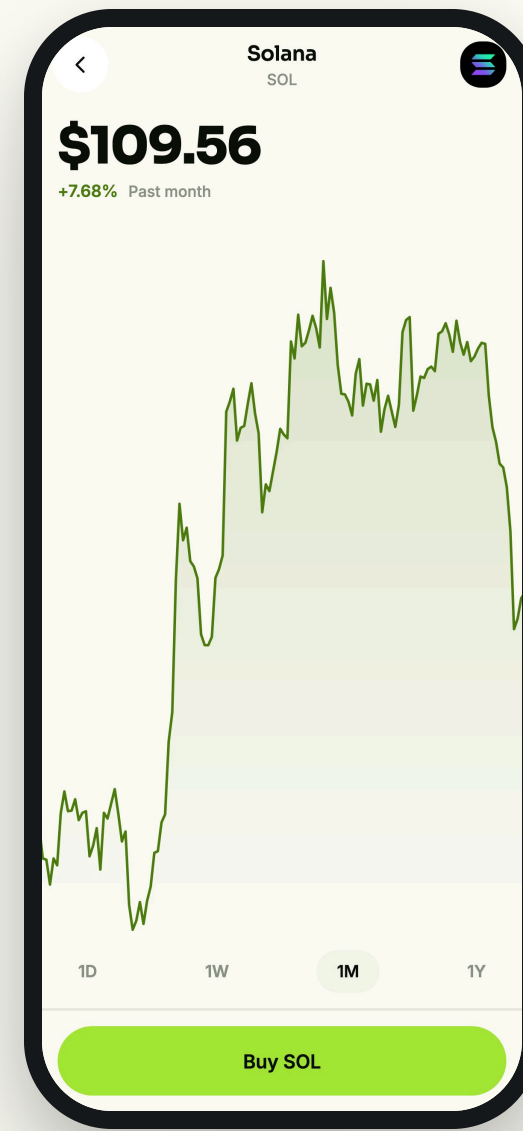

HOW IT WORKS

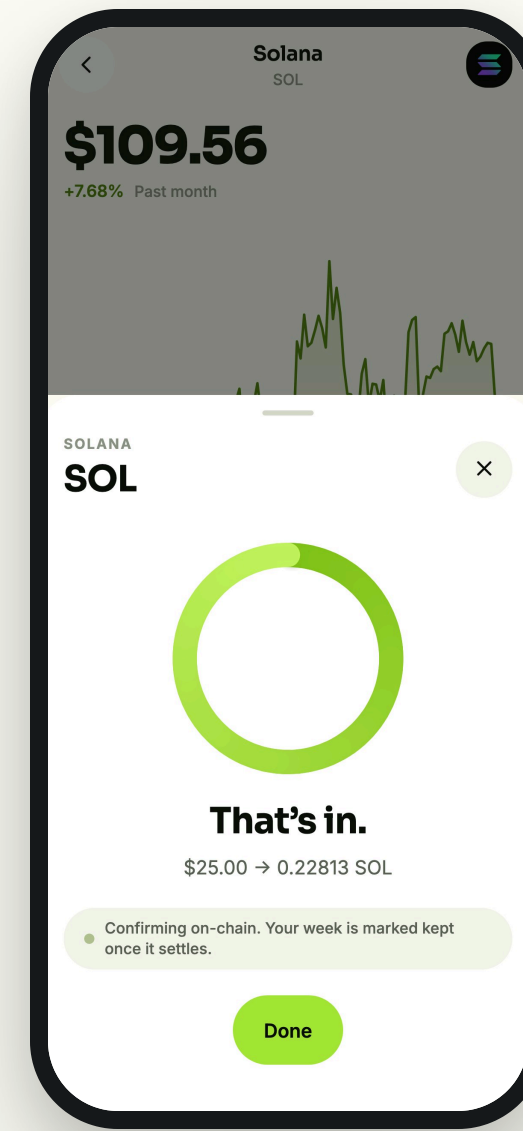

From promise to noticed, in a minute.

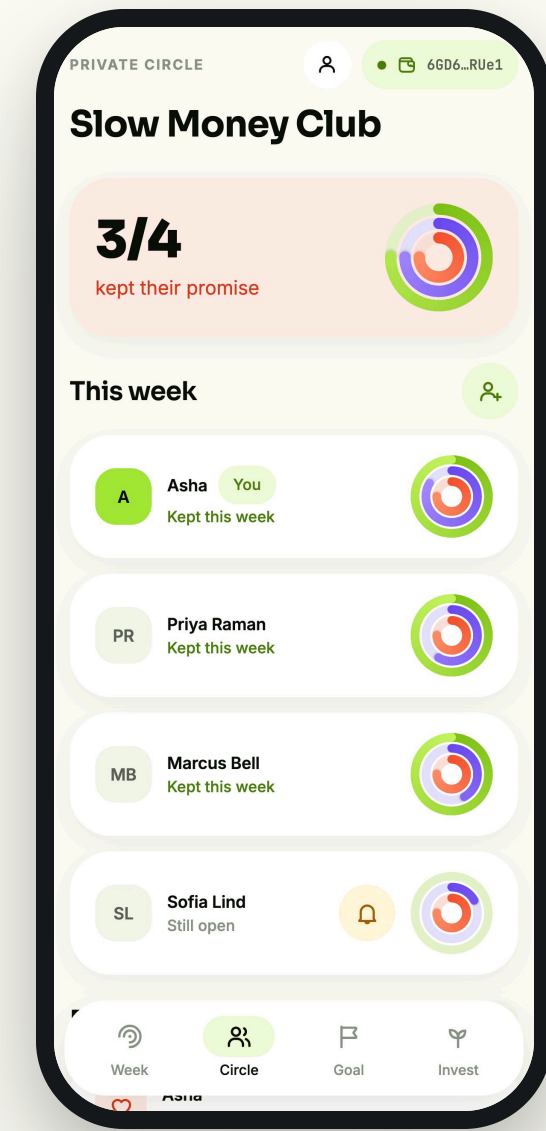

1 • **Promise** \$25 a week

2 • **Buy** a real asset

3 • **Kept** verified on Solana

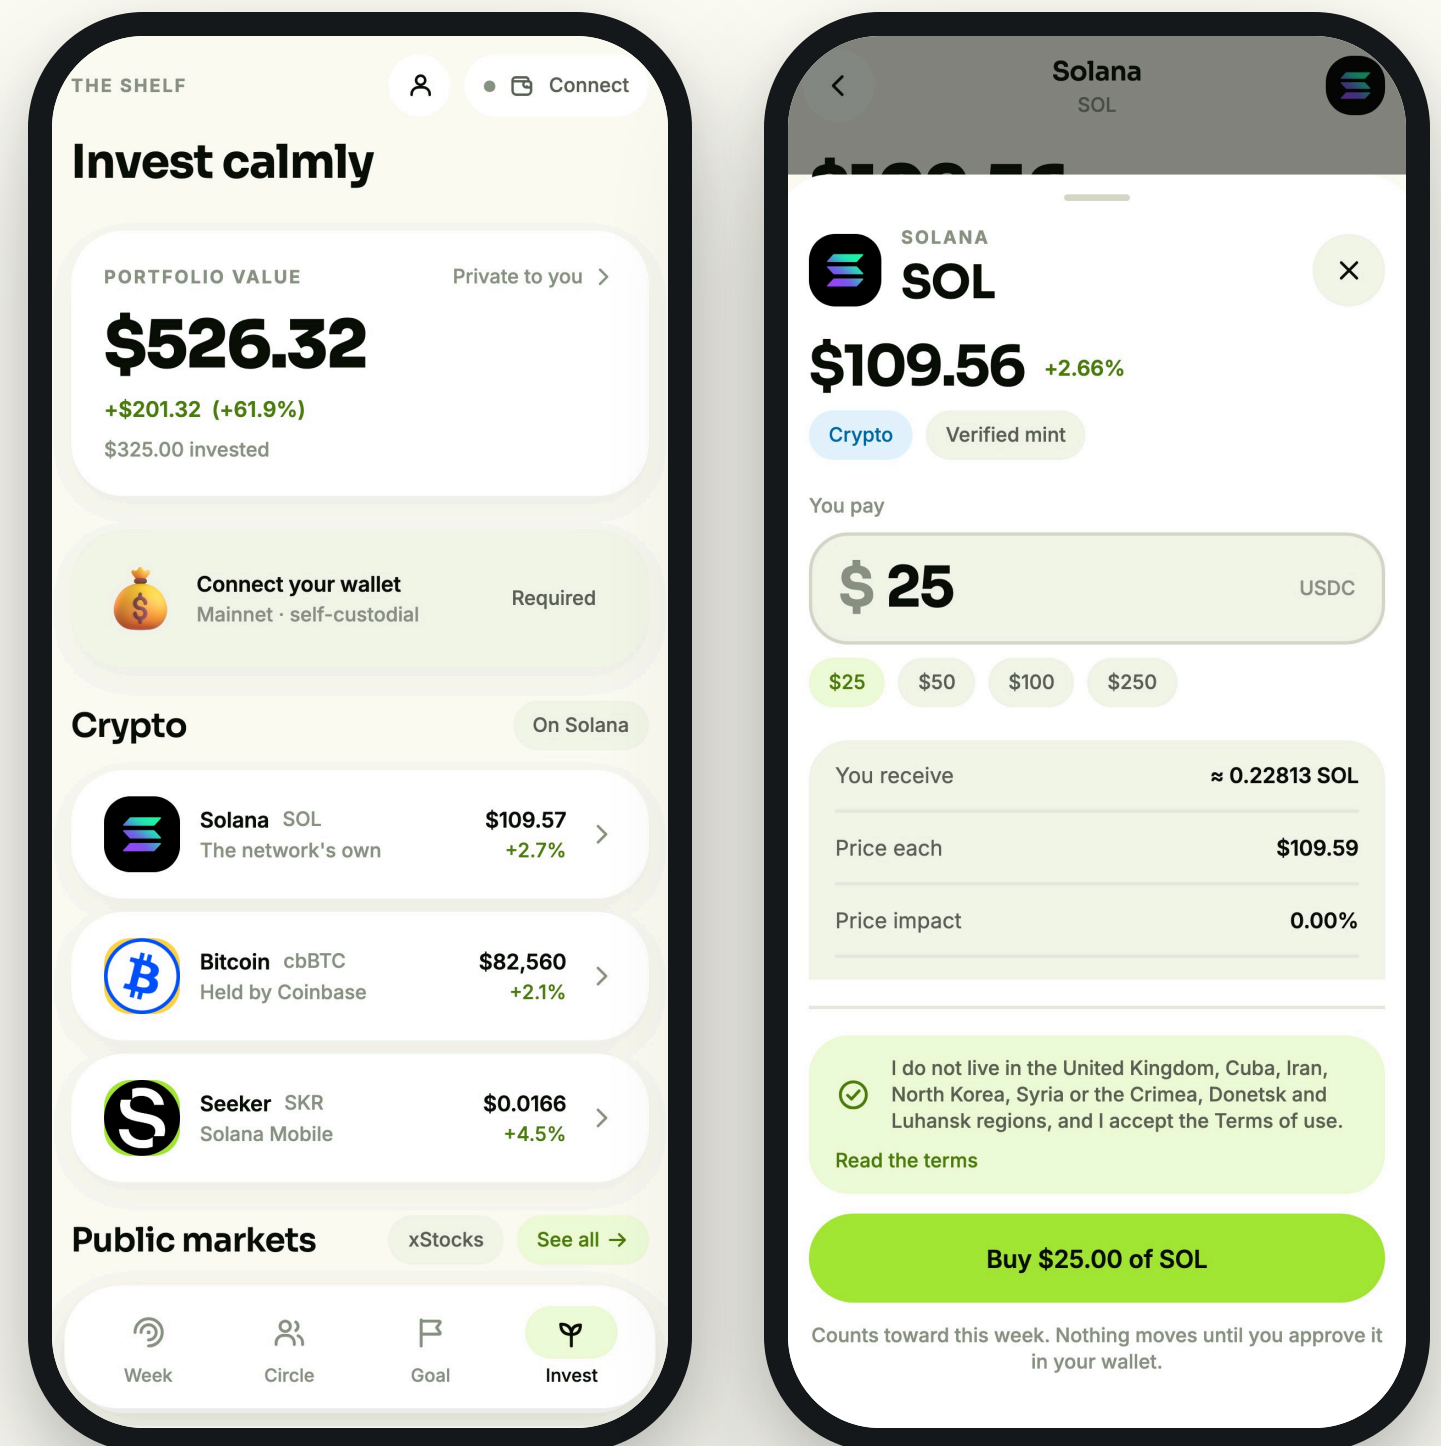

4 • **Noticed** by your circle

REAL ASSETS, ON SOLANA

A real position, in *your* wallet.

- **Crypto first:** SOL, bitcoin and SKR. Plus 1,100+ tokenized stocks.
- **Yours:** KEPT never holds your funds or keys.
- **Proven:** the ring fills only when Solana confirms the buy.

Tokenized stocks are not available to U.S. persons or in the issuer's restricted countries.
Crypto is not available in the UK or sanctioned regions.

PRIVACY

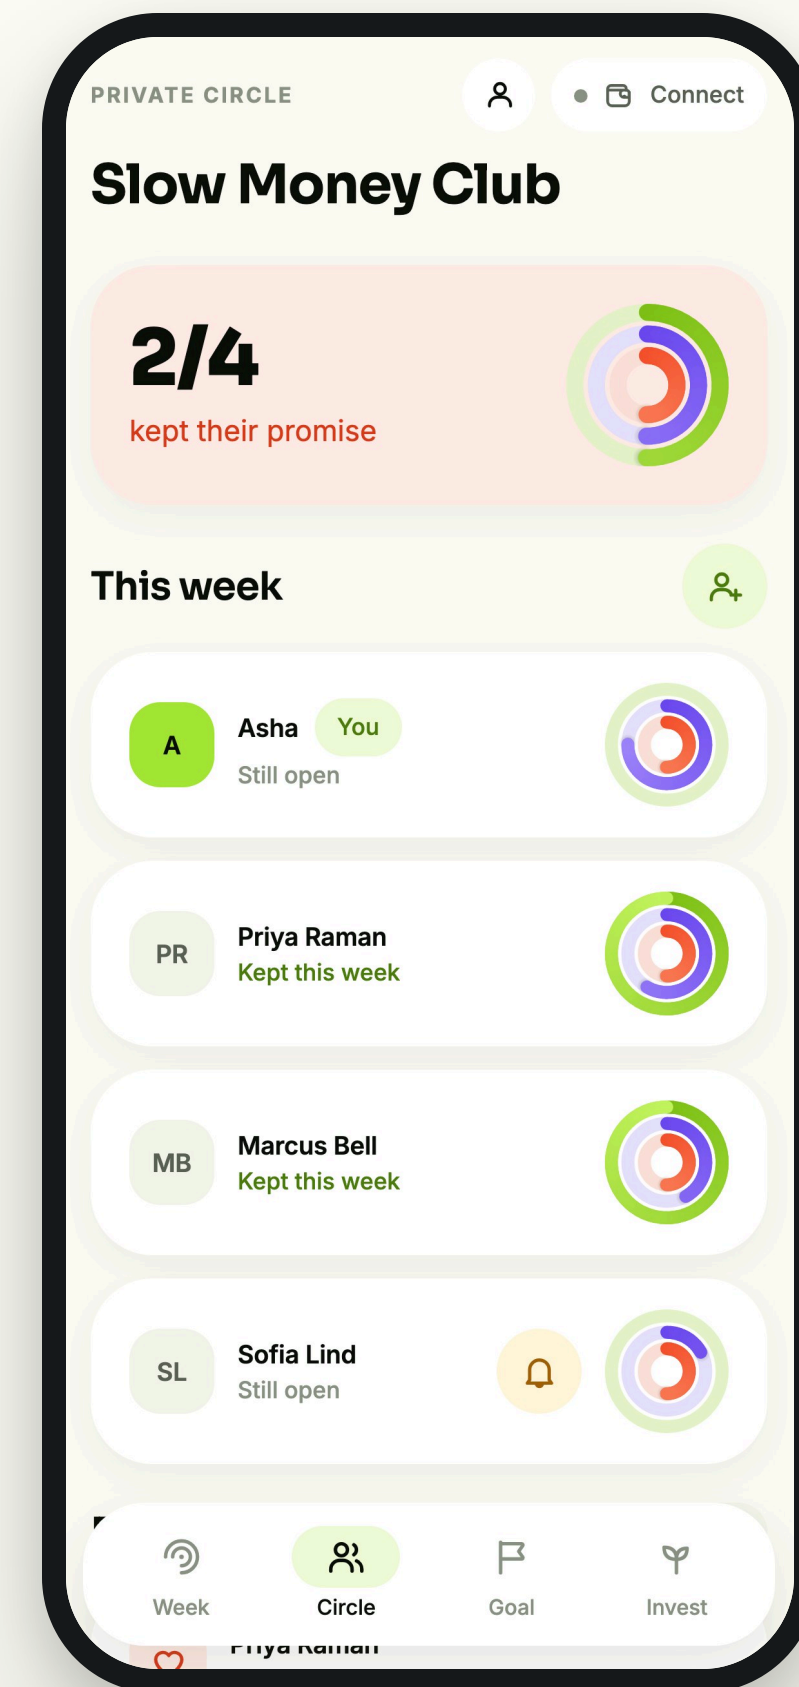

They see the ring.
Never the number.

Your circle sees

That you kept your week ·
your streak · your awards

Nobody sees

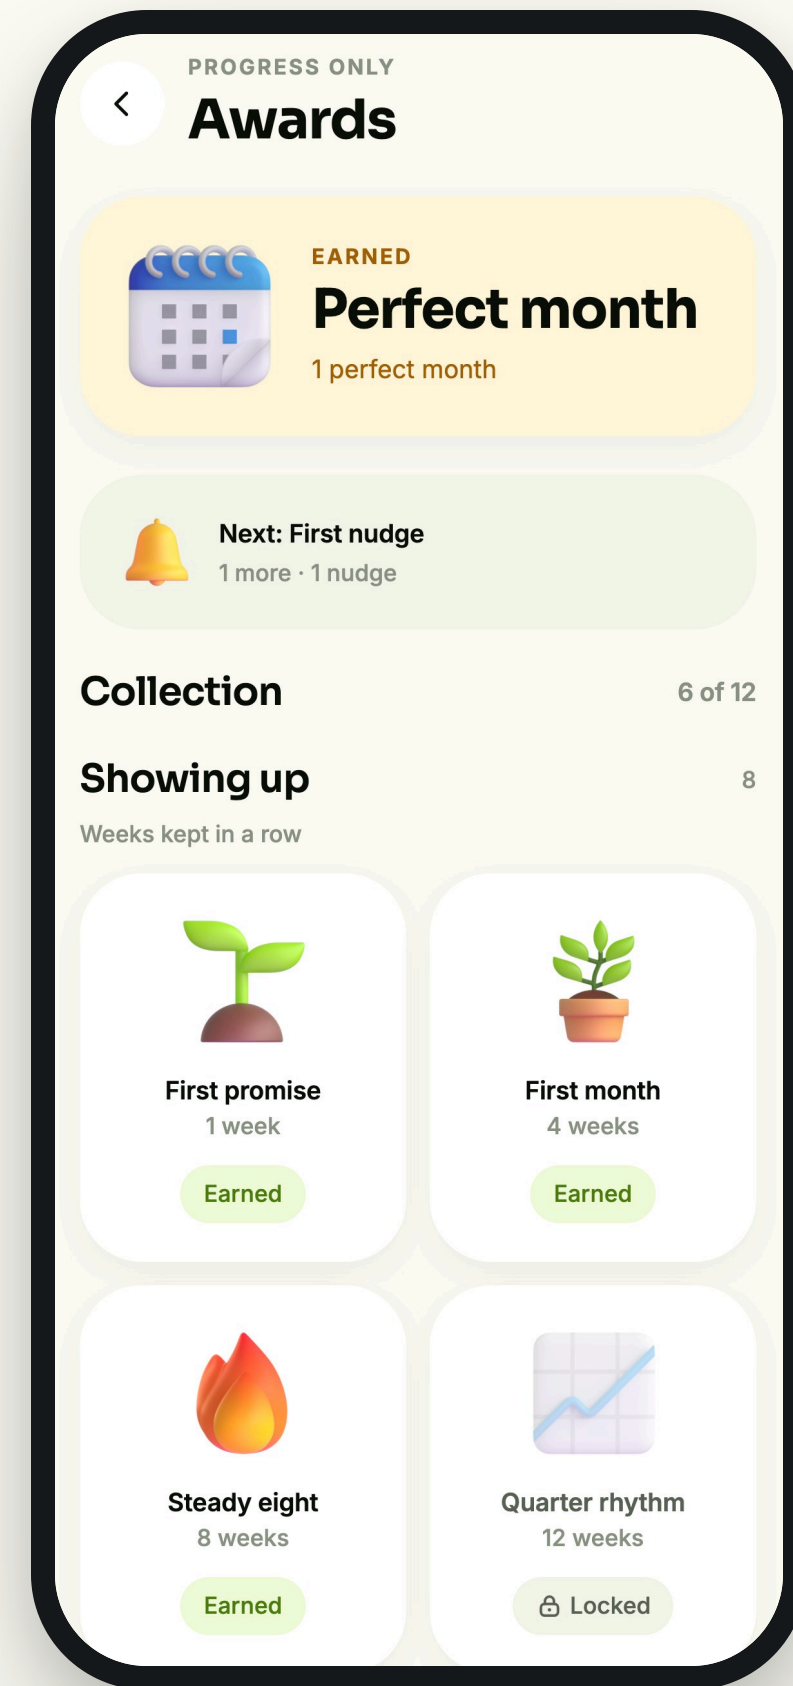

How much · what you
bought · what it's worth

WHY PEOPLE COME BACK

Built for the six days in between.

- **A streak that forgives** one missed week.
- **Awards** for showing up, never for being rich.
- **Nudges and cheers** from your circle.
- **Your rings** on the home screen.

MARKET

Start where the wallet *already* is.

START

100,900

Seeker owners, wallet in the phone

NEXT

15M

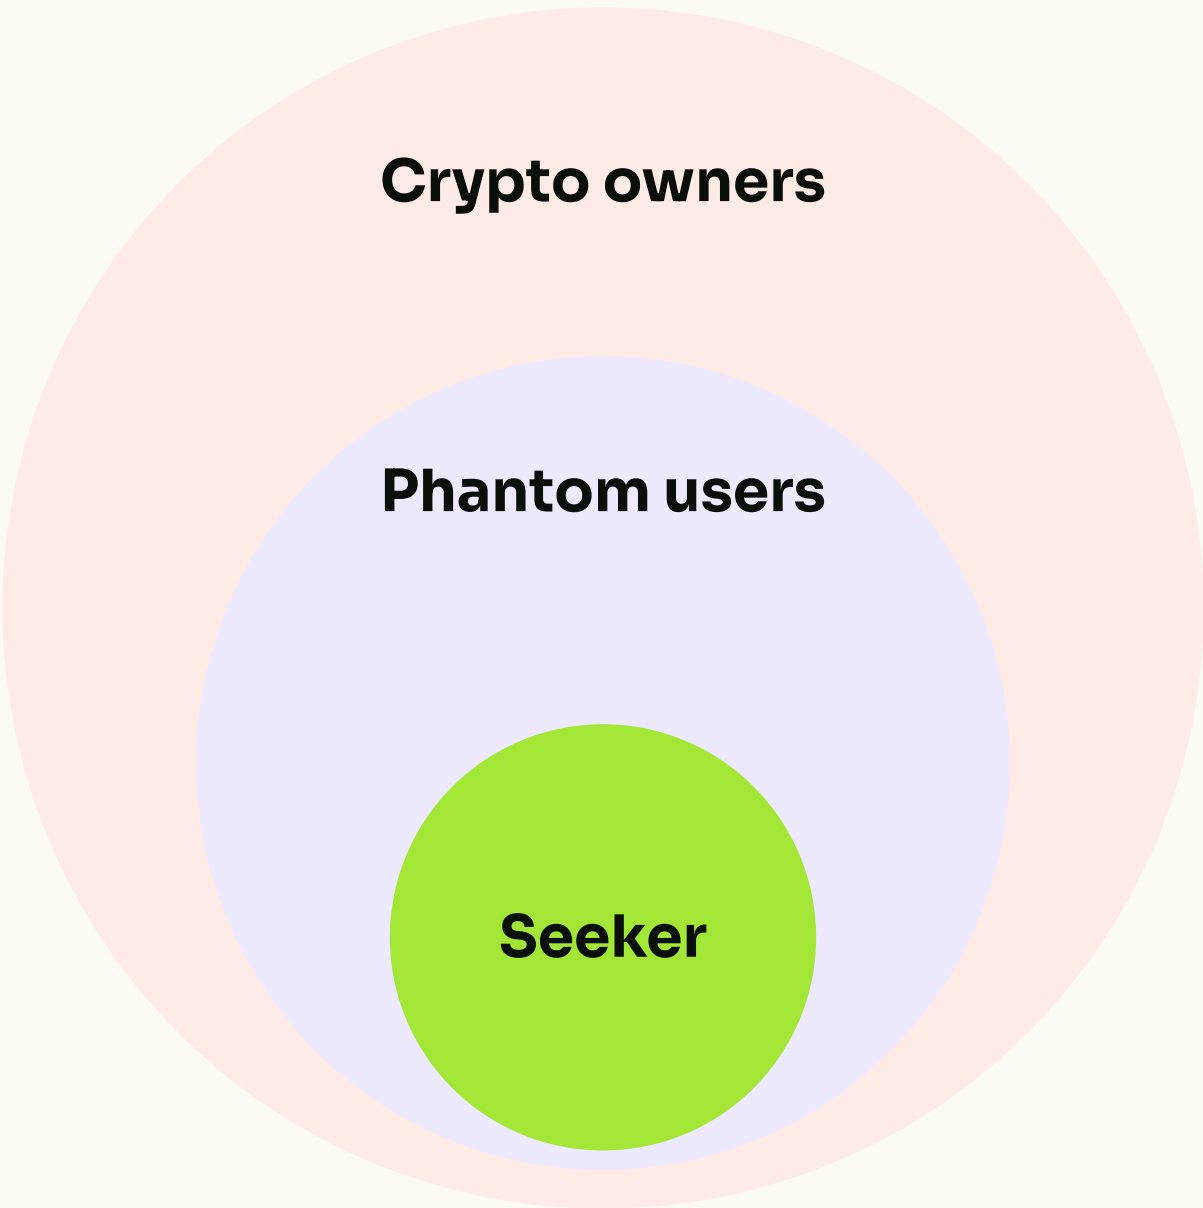

Phantom users a month, on any Android

THEN

741M

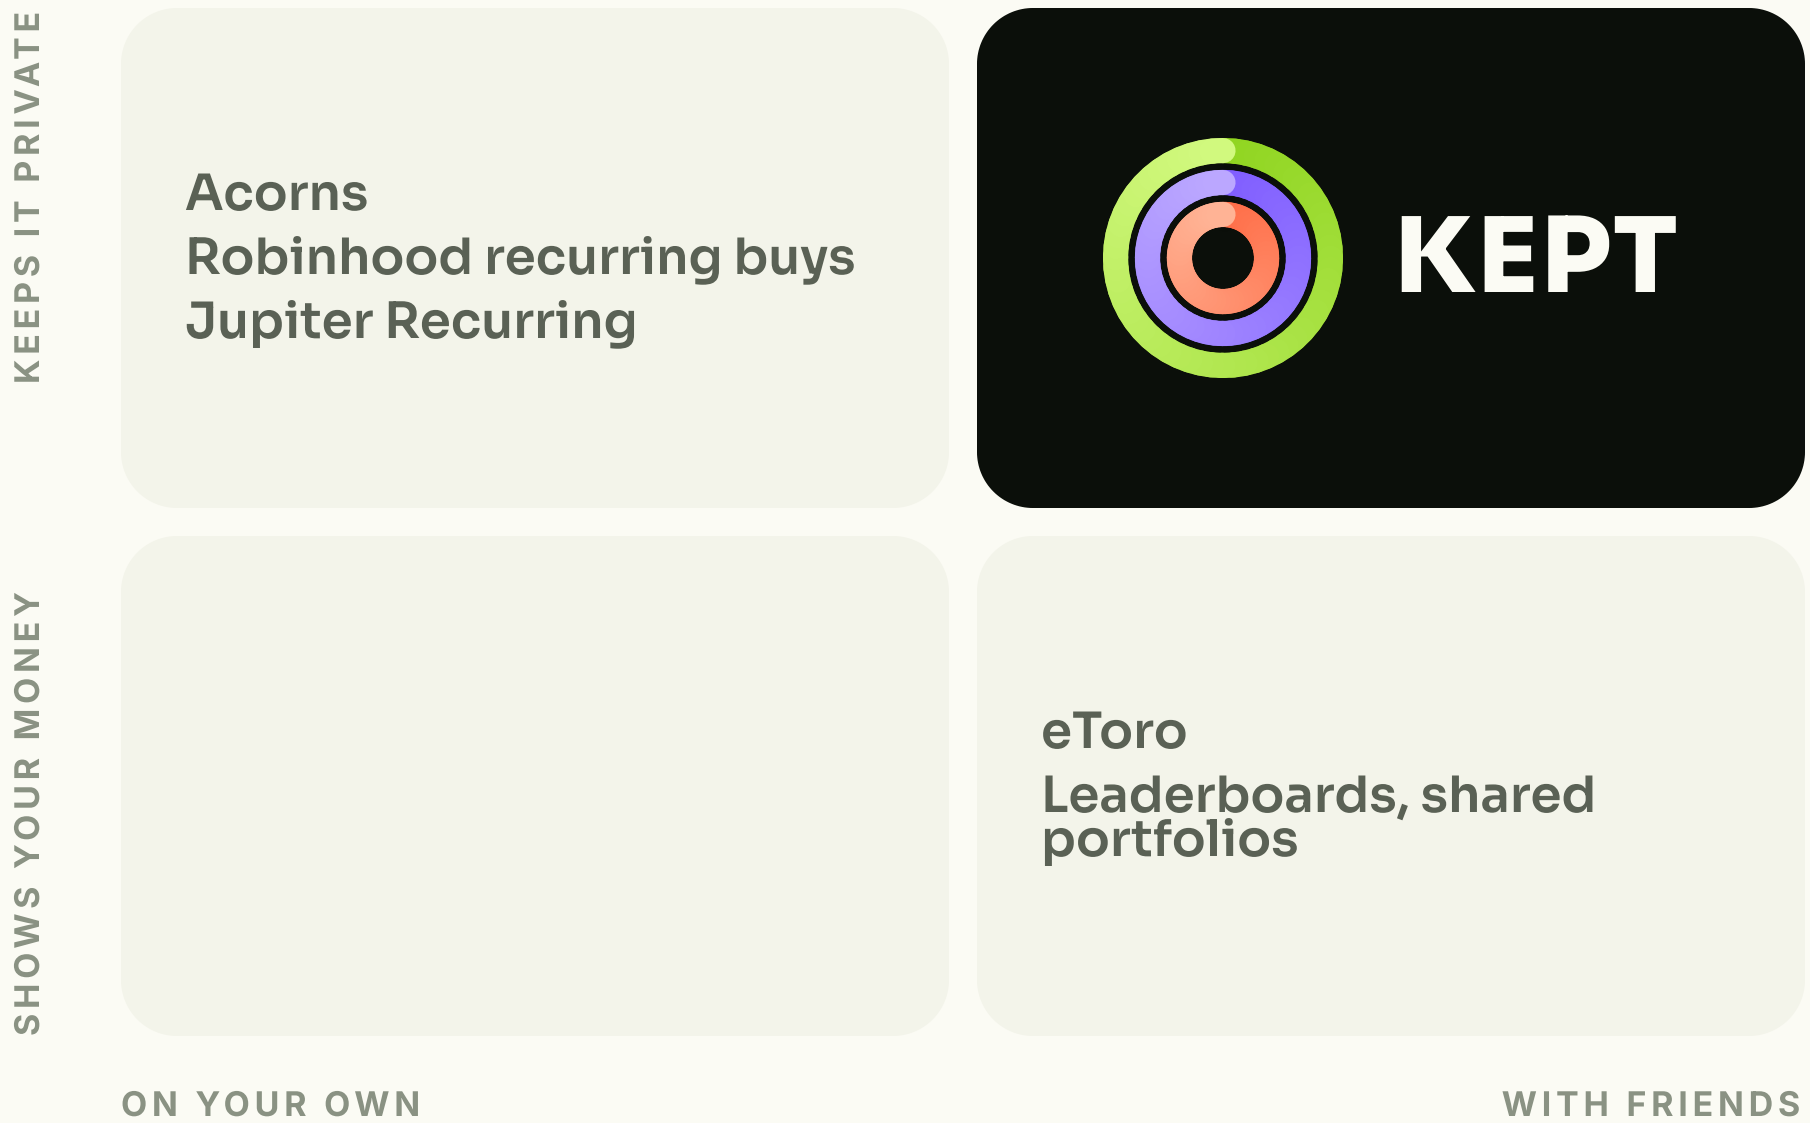

Crypto owners worldwide

Sources: Solana Mobile, SKR airdrop (Jan 2026) · Phantom (Jan 2025) · Crypto.com (Feb 2026)

COMPETITION

Social, and still private.
Nobody else is *both*.

Friends see that you showed up.
Never what you have. And the assets
stay in your own wallet.

BUSINESS MODEL

**We earn when you
keep your promise.**

- **1% commission on every buy**, inside the swap.
Selling is free.
- **One kept week, one commission.** We grow when habits do, not when people trade more.

ONE PERSON, \$25 EVERY FRIDAY

Invested in a year	\$1,300
--------------------	----------------

Commission at 1%	\$13
------------------	-------------

150,000 people, 1% of Phantom's users

\$1.95M a year

An illustration of the model, not a forecast.

GO-TO-MARKET

Every promise brings a *friend*.

FIRST · SEEKER

**The dApp Store, with
SKR on the shelf.**

BUILT IN · CIRCLES

**Onboarding ends with
an invite. Each circle
is up to five friends.**

THEN · EVERY WALLET

**Phantom and Solflare
on any Android
phone, then iOS.**

Most investing apps ask what you're worth.

This one asks whether you *showed up*.
